

10 Things to Look for in a Medical Material Testing Supplier

- 1. Deep Experience** West Penn Testing (WPT) has been in business for 60 years and has been testing material for medical OEM for 20 years.
- 2. Trained people** WPT increased its pool of trained inspectors by 65% in 2011 and will increase its ranks by an additional 50% in 2012.
- 3. State-of-the-Art Equipment** In 2012, we will complete installation of phased-array, ultrasonic-testing technology for inspecting large billets.
- 4. Testing Capacity** We added 3 new testing cells to our existing group of 5 cells in 2011—a 60% increase. We plan to add more cells in 2012.
- 5. Operational Excellence** WPT has been continuously improving best practices throughout its facilities based on lean principles. Our goal is never to be the bottleneck in your supply chain.
- 6. Knowledge of Producers** We have worked with all the major raw material suppliers in North America. We understand their requirements and know how to work with them.
- 7. Certifications** WPT's quality system is based on ISO-9001 and we have a broad spectrum of certifications, accreditations and customer approvals. See our website: www.westpenntesting.com
- 8. Setting Standards** Our testing research and development efforts over six decades have resulted in the establishment of numerous inspection protocols and standards.
- 9. Medical Specialization** Oscar Lewis, an NDT Level III who has in-depth experience with medical materials, has recently joined WPT to enhance our capabilities in the medical market sector.
- 10. Market Understanding** Extensive service on behalf of medical-implant OEMs has given us the experience, know-how and problem-solving track record to tackle the most demanding challenges confidently and effectively.

The Standard By Which All Other Testing Laboratories Are Measured.
