Business Background

Kelly IT Resources (KITR) is a specialty service of Kelly Services, Inc., a leader in providing workforce solutions.

Since its launch in 1999, KITR has placed information technology specialists across a comprehensive scope of services, including application development and integration, data warehousing and business intelligence, software quality assurance and testing, enterprise maintenance and support, data storage, infrastructure support, disaster recovery and business continuity, and network engineering.

Today, KITR operates throughout North America, Europe, and the Pacific Rim. Branches are staffed and managed by seasoned professionals with broad experience in the IT industry.

KITR maintains active involvement with national and local industry organizations, including the National Technical Services Association, Information Technology Association of America, National Association of Computer Consultant Businesses, and local Council of Regional IT Associations.

Milestones

- In 2009, KITR began to supply customized IT staffing solutions to healthcare organizations around the country to ensure that they were prepared for the arrival of health informatics - the application of computer information systems to healthcare and public health providers. With the help of electronic healthcare records, medical providers will be able to access patient's medical histories and prescriptions nationwide during the coming years.
- In 2009, KITR partnered with the National Academy Foundation (NAF) to award monetary scholarships to two high school seniors graduating from IT Academies.
- In 2006, KITR entered the Australian market with the opening of a branch in Sydney, Australia. KITR has a global presence with operations in Australia, Canada, France, India, Italy, Malaysia, Mexico, Netherlands, New Zealand, Puerto Rico, Russia, Singapore, Switzerland, and the United States.
- In 2002, KITR launched the IT Learning Center, which offers more than 2,000 relevant information technology courses to enhance the knowledge and productivity of its employees.
